Professional Summary

Results-driven Software Engineer with 3 years of experience in designing and developing scalable applications using **C#, .NET, ASP.NET, and SQL**. Skilled in **REST API development, front-end frameworks, and Agile methodologies**. Experienced in collaborating with business teams to gather requirements, automate workflows, and deliver high-performance solutions. Proficient in **Object-Oriented Design, Entity Framework, LINQ, and cloud technologies (Azure)**, with strong expertise in unit/integration testing and CI/CD practices.

Experience

Associate IT Consultant

USA

ITC Infotech Inc

Oct 2024–Present

- Implemented features for enterprise-grade applications using **C#, .NET, Web APIs, MVC framework**, boosting workflow efficiency by 20%.
- Migrated **VB.Net WinForms** to ASP.Net Razor Pages, reducing costs by 40% and improving performance by 35%.
- Worked with **Oracle Database** to query, manage, and update production data, streamlining manufacturing workflows and improving system accuracy by 30%.
- Implemented **Entity Framework and LINQ** for optimized data access, reducing query execution time by 25%.
- Provided functional support and collaborated with cross-functional teams to gather requirements and deliver stable features with minimal downtime, accelerating release cycles by 20%.
- Mentored new team members, offering guidance on debugging techniques and database optimization, contributing to faster onboarding and team efficiency.

Associate Software Engineer

Bangalore, India

Aptean Pvt Ltd

Jun 2021–Jul 2022

- Spearheaded development of client-specific features for a scalable application supporting 25+ clients, leveraging **C#, Node.js, MS SQL Server, .NET Core, VB.Net**, driving a 20% increase in client satisfaction.
- Enhanced application UI using **HTML, CSS3, JavaScript, jQuery**, aligning with evolving client requirements and improving overall user experience by 25%.
- Developed a responsive web portal UI with **React.js, Redux**, connected to ASP.NET Core Web Application using REST APIs, cutting page load time by 40% across desktop and mobile platforms.
- Built and integrated scalable **REST APIs** handling 100K+ daily transactions, implemented **JWT-based authentication**, and performed API testing using Postman and SOAP UI.
- Optimized **MS SQL Server** performance with stored procedures and indexing, cutting data retrieval latency by 20%.
- Practiced **Agile development** and utilized Git for version control in CI/CD pipelines; contributed actively in sprint planning, daily scrum, and retrospectives.

Software Engineer Intern | Opentext | Bangalore, India

Jun 2020–May 2021

- Conducted **manual and automation testing** in containerized environments using Docker and Kubernetes, improving test accuracy by 25%.
- Assisted in designing **microservices** for scalability and maintainability, increasing resource efficiency by 30%.
- Documented software functionalities and new features across different application versions for stakeholders.

Technical Skills

- **Languages:** C#, Java, Python, JavaScript, TypeScript, C
- **Frameworks:** .NET Core, ASP.NET, MVC, Entity Framework, LINQ, Spring Framework, Django
- **Frontend:** HTML5, CSS3, React.js, Angular, jQuery
- **Databases:** SQL Server (T-SQL), Oracle, MySQL, PostgreSQL
- **Tools:** Git, Azure, Docker, Postman, Jira, Kanban
- **Methodologies:** Agile/Scrum, Object-Oriented Design, CI/CD, Unit/Integration Testing, Code Reviews

Projects

Graph Algorithms on IMDb Dataset

Implemented BFS, DFS, and Dijkstra's algorithms for large-scale graph analysis.

Permission Approval System

Developed a full-stack app using **ReactJS, JDBC, and Servlets** for user management.

Education

Master's in Computer Science, University of South Florida

Aug 2022–May 2024
